

Docker Container Volume

Creating and Mounting a Volume

```
$docker volume create <volume_name>
```

Creating a volume

```
$docker volume Prune <volume_name>
```

Remove unused volume

Two ways to mount a volume using the `'-v'` or `'-volume'` argument or `--mount` argument

```
$docker run -it -v <volume_name>
```

Docker Container Network

Docker Networking 101
